

# ST1500U Signature Pad

Accurate. Reliable.  
Proven.

## Scriptel Embedded Static Capacitive Glass Digitizer

- Resists Scratches, Spills, and Drops
- Sub-Pixel Input Accuracy
- Technology deployed in nearly 3 million Point-of-Sale devices
- Over 25 years of expertise developing pen input systems

## A Complete Solution

- Palm Rejection: Hands or fingers resting on the screen will not distort the signature.
- No Batteries: Never worry about inconvenient disruptions
- Includes Microsoft Office and Adobe Acrobat plugins
- Developer Support

The ST1500U follows Scriptel's design methodology for developing the highest quality products at the lowest possible cost. The sensing layer of the digitizer is coated underneath the glass, resulting in consistent performance in high traffic environments.
